EMPLOYMENT HISTORY

Triple Data

.NET Application Developer

Develop large-scale web applications for various companies in Toronto. Consult with clients on the requirements for their projects and convert them to practical online applications.

Toronto, ON

Nov 2010-Present

D. Miller Enterprises

Self Employed

Created my own company to do consulting, contract work and create web-sites for personal and business use. Develop custom interfaces and applications for each project based on the client's needs. Includes consulting, design, programming and publication of each website.

Toronto, ON

2008-Present

University of Ontario, Institute of Technology

Application Developer/ Software Development Research Assistant

Sole developer for an iPhone application created to encourage fitness among children. The application works as a counter for various exercises and records the number of reps and time taken then sends the data to a database through a web interface.

Oshawa, ON

Summer of 2010

Ripple Effect Games

Toronto, ON

Co-Founder / Game Programmer

2009-Present

Established an independent game development company with a partner to create games in our spare time. Responsible for all the programming as well as the majority of the business aspects for the company. We have had several people working on first game project and completed a demo, which we presented to publishers at E3.

LeaseArrangers.com

Courtice, ON

Web Developer

2008-2009

Developer for the website leasearrangers.com. Involved in all aspects including designing, programming, marketing and database development.

Spill Magazine

Oshawa, ON

Web Content Manager

2006-2008

Making regular updates to the web-site, adding new pages and content. Also responsible for converting and uploading media to be displayed on the site.

C O N T R A C T W O R K

Nelson Publishing

2009-Present

Web Consultant / Flash Developer/ Technical Assistance

- Currently working as web consultant for the creation of a textbook to teach students how to create a website for their business.
- Created a flash application to accompany a textbook which allows students to interact with a compass rose and learn the different directions and angles.
- Provided technical support in resolving problems with electronic presentation materials.

Lakewood Garden Centre

2010

Web Developer

Recreated the lakewoodgardencentre.com website, did a complete redesign and created a backend Content Management System that gave them control of the content of their pages as well as the images in the photo albums.

Advanced Health Care

2010

Web Developer

Worked with Advanced Health Care to convert their website from static content to a dynamic custom Content Management System (CMS) to give them the ability to edit the pages themselves and manage the manufacturers/products available. Also integrated new content to the website.

Doula Speed Dating

2010

Web Developer

Created a website for Doula Speed Dating that will display information about the company and give them the ability to sell packages to event hosts. The website includes a calendar of events with an administrative backend controlling the events and event hosts.

The Nesting Place

2009

Web Developer

Developed a website for The Nesting Place to allow clients to browse through resources about the company and information on doulas. Also gives clients the ability to register for classes and contact the company.
